

GLYcoDiag is a French company specialized in **glycobiology and glycoanalysis services and products** for the biotech, pharma, veterinary, cosmetic and diagnostic industries. Our unique experience provides the services and products needed to speed up your projects. **Visit our website for more information www.glycodiag.com**

GLYcoPROFILE® - A method to predict potential biological activities?

GLYcoPROFILE® is a powerful method based on a lectin array that enables **to study the structures and accessibilities of glycans motifs** from oligo/polysaccharides, glycoproteins, glycolipids, proetoglycans or glycosaminoglycans. It gives the opportunity to **discover new glyco-products** and to **anticipate potentials biologicals activities** mediated by proteins-sugars interactions.

In the last ten years GLYcoPROFILE was used in the research and development of more than 50 cosmetic actives. GLYcoPROFILE is useful to screen cosmetics ingredients and select the best candidate for the intended application.
